-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-7 in the reply filed on 02/09/06 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: the steps of preparing the produce.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tottenham et al. (6,264,889) in combination with Ecker (6,148,989).

Tottenham et al. disclose a method and apparatus for pasteurization of food products and processing equipment. The reference discloses transporting the produce on a conveyor (80), and applying steam to the outer surface of produce. See the abstract, col. 2, lines 47-59, and Fig. 1. The reference discloses bathing the food with chilled water after applying steam. The reference also discloses that alternatively, the water may or may not be chilled, and may include chlorine, or some other suitable food and equipment grade-sanitizing agent. See col. 5, lines 11-50.

Tottenham et al. do not teach the pressure, washing the produce on the conveyor before applying steam, and rotating the produce as claimed.

Ecker discloses a method and an apparatus for cleaning produce. The reference discloses washing, rinsing, and sanitizing the produce. The reference also discloses rotating the produce during transporting the produce on a conveyor. See the abstract, figs. 3, and 6, col. 4, lines 21-36, and col. 8, line 45-27.

It would have been obvious for one skilled in the art to rotate the conveyor during transporting the produce taught by Ecker in the Tottenham et al. process to obtain uniform distribution of the steam or cleaning agent on the surface of the produce and to enhance the cleaning process. It would have been obvious for one skilled in the art to wash the produce before applying steam to improve the cleaning process, since Ecker discloses more than one treating station for treating a produce.

Tottenham et al. and Ecker do not teach the pressure as claimed.

It would have been obvious for one skilled in the art to adjust the pressure of the applied steam to obtain optimum results.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nwoko et al. (US 2001/0047814 A1 disclose a method and apparatus for sterilizing fresh fruit.
